Coimbatore – 641643**

**School of Home Science**

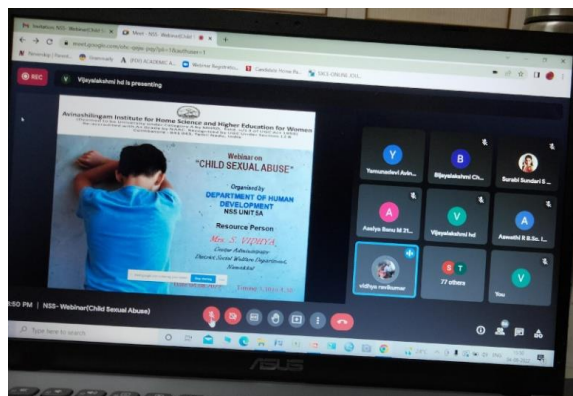

**Department of Human Development – Unit 5A**

**WEBINAR ON CHILD SEXUAL ABUSE**

A webinar on child sexual abuse for NSS volunteers of School of Home Science was organized by the Department of Human development. The webinar was conducted on 4<sup>th</sup> August 2022 at 3.30 pm to 4.30 pm through online mode. A total of 86 NSS volunteers, POs and APOs joined the webinar. Mrs.S.Vidhya, Centre Administrator, one stop centre, District Social Welfare office, Namakkal was invited as the speaker for the event. The objective of the lecture was to make students have sexual awareness. The speaker started with defining sexual abuse. Sexual abuse is unwanted sexual activity with perpetrators who use force, make threats or take advantage of victims without consent. Most victims and perpetrators know each other. Immediate reactions to sexual abuse include shock and fear or disbelief. Long-term symptoms include anxiety, fear or post-traumatic stress disorder. While efforts to treat sex offenders remain unpromising, psychological interventions for survivors — especially group therapy — appears effective. The speaker continued to speak on child sexual abuse, which is also called as child molestation, where an adult or older adolescent uses a child for sexual stimulation. Forms of child sexual abuse include engaging in sexual activities with a child (whether by asking or pressuring, or by other means), indecent exposure (of the genitals, female nipples, etc.), child grooming, and child sexual exploitation, including using a child to produce child pornography.

The speaker spoke about two main types of child sexual abuse: touching and non-touching. Touching includes touching a child's genitals, making a child touch someone else's genitals, playing sexual games etc for sexual pleasure. Non-touching abuse includes showing pornography to a child, exposing a person's genitals to a child etc. She also threw light on the facts about child sexual abuse like for every nine minutes child protective services substantiates, or finds evidence for, a claim of child sexual abuse, over 65,000 children are abused in the United States each year and approximately one in four adult women and one in thirteen men were abused sexually as children. She

also mentioned about the impact on a person's physical and mental health such as unplanned pregnancies, chronic health conditions such as obesity or cancer, depression and PTSD, substance abuse and increased risk of suicide. Finally, she spoke about prevention of child abuse. She gave some important points like, get involved with community-based prevention efforts, seek more information about how to prevent abuse and keep children safe, protect your own children, support child abuse victims, teach others about child abuse prevention and report suspected child abuse. The session ended with an interaction between students and the speaker. The coordination of students and teachers made the session a successful one.

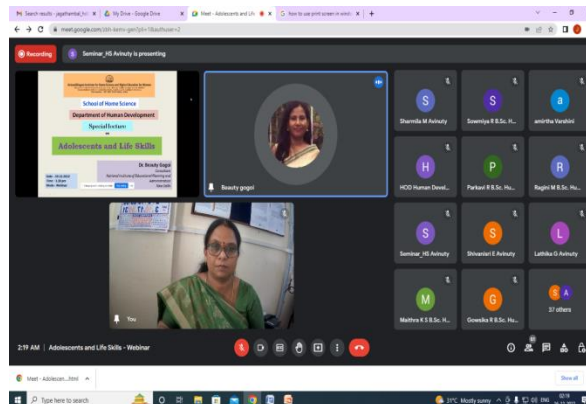

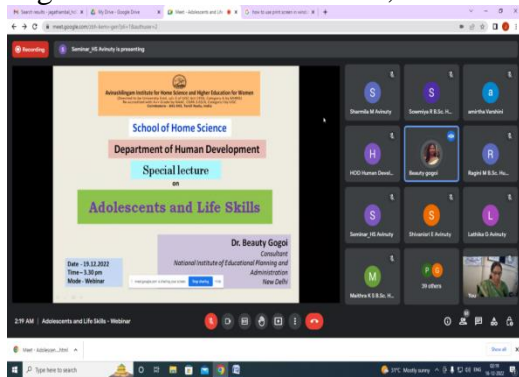

**Report on Special lecture**  
**Alumni Talk Series**  
Resource person  
**Dr. Beauty Gogoi,**  
Consultant

National Institute of Educational Planning and Administration  
17-B, Sri Aurobindo Marg, New Delhi-110016  
Alumni - M.Sc (Batch 96- 99)

An online webinar was held on the 19<sup>th</sup> of December 2022 on the topic of adolescents and life skills by Dr Beauty Gogoi, Consultant at the National Institute of Educational Planning and Administration in New Delhi and a Alumnus of Avinashilingam Institute of Home Science and Higher Education for Women, Coimbatore.

The special lecture was organized by the Department of Human Development and was for all UG students of Human Development. The event began with a prayer song done by Illakiya of 2<sup>nd</sup> UG and was followed by a welcome speech given by Amrithavarshini of 1<sup>st</sup> UG whilst the vote of thanks was delivered by Sowmiya R of 3<sup>rd</sup> UG.

The lecture covered many important aspects of personal and self development which is essential for the growth of today's youth. This included self belief, self confidence and up skilling oneself to meet the demands of today's world.

Apart from this the lecture also covered on the ways one can transverse their career trajectory after studying human development and different career paths one can take after completing a graduation in the subject. Dr Gogoi, also spoke about the adult education, its needs in today's world as well as her experience with rural development, working in the remote areas of Assam and northeast India.

The talk gave many ideas regarding their own careers as well as served an inspiration for all in the Human Development family regarding the purpose of studying HD, it's implications and impact in the modern world and the ability of the subject to develop an individual's personal and professional lives.

Overall, it was a very good learning experience for all students and one that needs to be done more often to give students the exposure they need to advance professionally.
